AND DOORS ARE
CRAFTED WITH FEATURES
THAT HELP YOU PROTECT
WHAT MATTERS MOST

*Thank you for a lovely job well done.
You have been a pleasure to work with.
I hope you get lots of work as a result of this Job.*

*Best Wishes
Ms M Toole, Castleknock*

ALUMIL SUPREME S650 ALUMINIUM SLIDING DOOR

SUPREME S650 PHOS is the ideal solution for projects requiring wide spans with minimal aluminium site lines. Massive yet elegant glazing surfaces are achieved while maintaining high functionality, performances and minimal architectural design.

The system's main advantage is the improvement of living conditions by maximizing the natural lighting and minimizing the visible aluminium face width, which makes the residents feel closer to the external environment and increases their sense of freedom.

All the aluminium profiles can be totally concealed in wall so as to maximize natural light and thermal performance.

Only 25 mm visible aluminium face width at the interlocking profile.

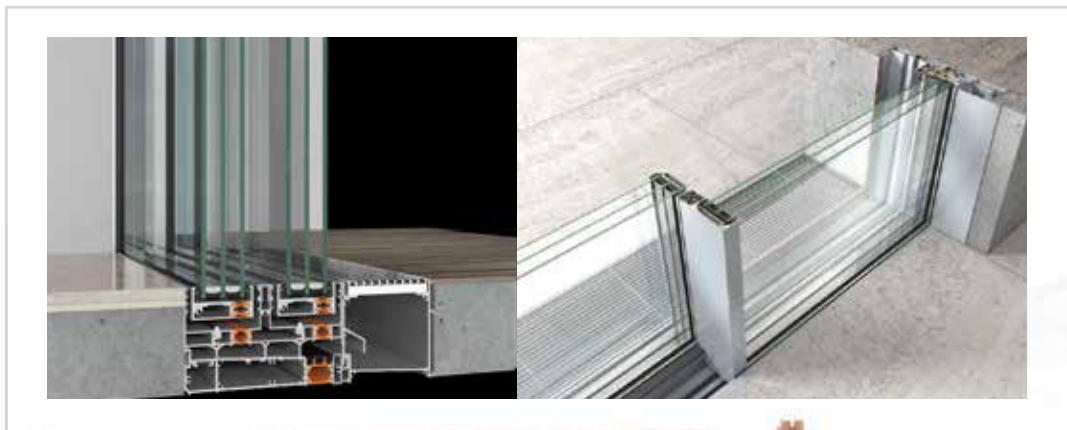

Extra concealed profiles available for water drainage.

Stainless steel rollers for smooth sliding & maximum functionality with high tolerance in corrosion.

For all parallel sliding typologies including the corner constructions.

Special profiles for the implementation of multi-sashtypologies.

BBA Certification of 1.1 uvalue with triple glazing

SUPREME S650 e-MOTION

SUPREME S650 e-MOTION system is SUPREME S650 series version with electric motion.

The elegant design and the superiority of the electric motion make it the perfect solution for constructions that require wide spans, perfect functionality and comfort, without restricting the view to residents. The innovative design of the profiles of the automated SUPREME S650 PHOS in combination with the concealed mechanism ensures the smooth motion of the system with emphasis on safety and functionality.

Main Characteristics of the system is the capability to integrate the profiles into the wall (to be organised in conjunction with project architect and or building contractor).

Remote controlled electric motion for ease of use.

Central control motion sensor, locking, fire and trapped through cache circuit board (PCB) for maximum security.

Narrow interlocking profile with only 25 mm visible aluminum face width.

Operates in cases of blackout thanks to a battery included in the mechanism.

Extra concealed profiles available for water drainage.

NATIONS FAVOURITE THE ALUMINIUM BIFOLD DOOR

Bi-fold & frameless alumil Supreme SF85 Aluminium bifold door.

Featuring Supreme SF85 Aluminium bifold door a truly versatile door system that promises the best of both worlds.

Bring the outdoors indoors;

SUPREME SF85 is an exceptional folding door system with minimal design and extraordinary narrow sight lines. At the same time, the series offers outstanding performance and the ability to create very large constructions.

The system achieves very large dimensions in terms of:

Height: up to 4,0 m.

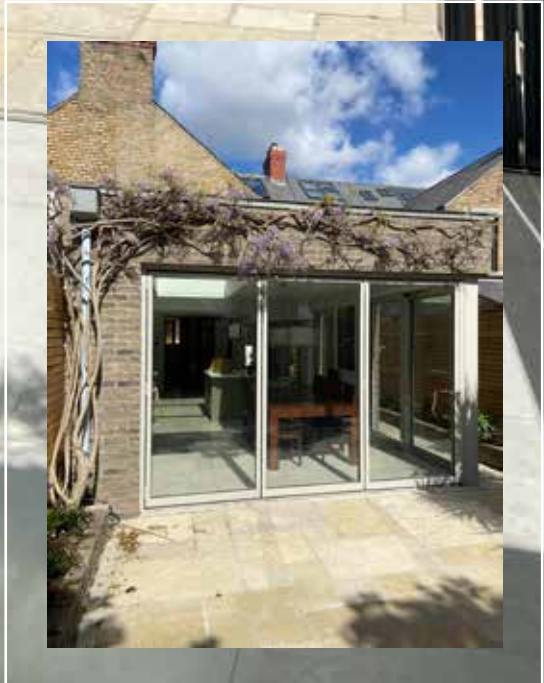

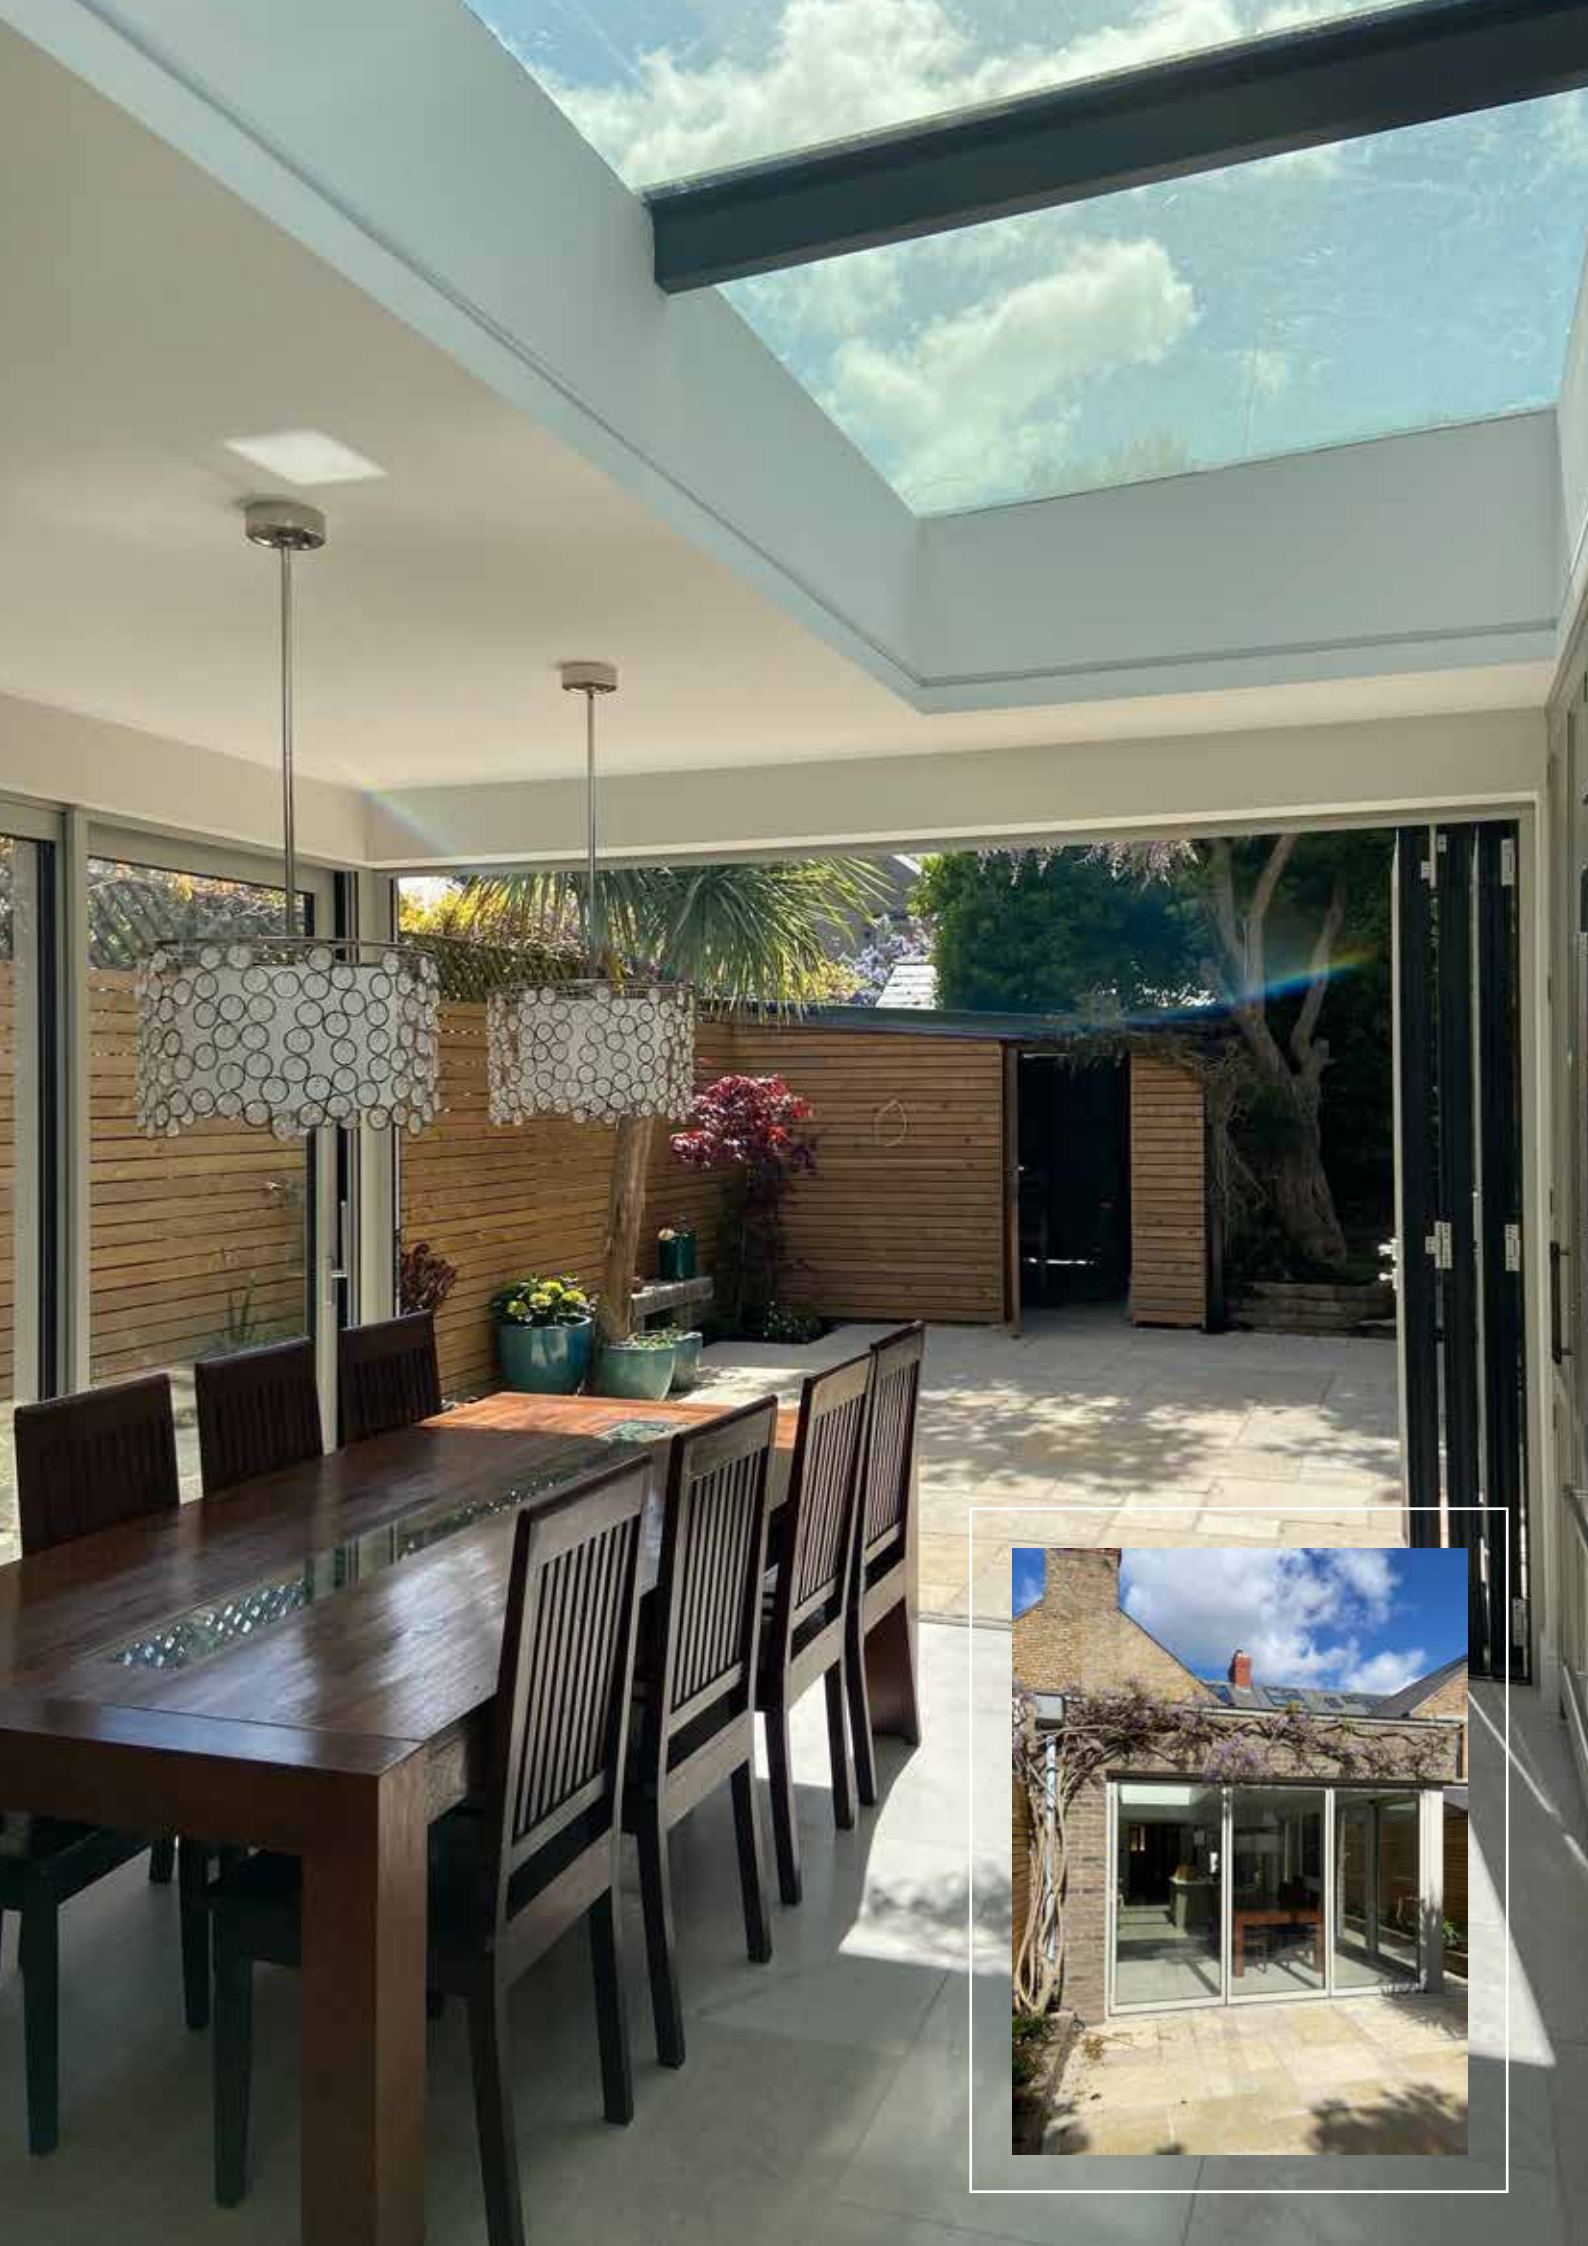

Sash width: up to 1,5 m.

Total width: possibility for large number of vents and very wide spans

Air permeability: class 4.

Wind load resistance: class C3/B3. / Water tightness: class 7A.

Certified by the IFT Rosenheim Institute.

*Our customers enjoy a superior window
buying experience from concept to
completion with care.*

ALUMIL S700 SUPREME LIFT AND SLIDE INSULATED ALUMINIUM DOOR SYSTEM

The lift and slide system Supreme S700 represents the new evolution of Alumil's advanced systems for projects with wide spans and impressive characteristics. The system complies perfectly with the modern trends of "transparent" architecture, combining high thermal insulation, safety and modern design.

Its minimal design along with the state of the art technology make it the ideal solution for projects enhancing natural lighting, satisfying even the most demanding requirements.

Interlocking face width only 47mm for maximum visibility and reinforced profiles for door height up to 3.0mm
Innovative low threshold for easy access and high performances
BBA certification on u-values:
double glazed 1.4
Triple glazed 0.92

ROOFLIGHTS

- ✓ Any Colour
- ✓ Many Glazing Options including self cleaning & triple glazed
- ✓ Electric or Manual Vents available
- ✓ Structural Aluminium Sections
- ✓ Glass fin option
- ✓ BBA Certification on uvalues:
- ✓ Double glazed 1.4
- ✓ Triple glazed 0.82

SUPREME S77 WINDOWS

The system Supreme S77 is proposal for advanced insulating casements, with modern flat design which meet the high standards of private and public buildings in western Europe. It is the ideal solution for projects that require high performance and maximum safety.

Furthermore the system offers minimal design for windows with the option of concealed sashes and fittings. The Supreme S77 satisfies the demanding levels of thermal insulation and water tightness performances.

BBA certification on uvalue of 0.94 on triple glazed units

Also available with concealed sash.

ALUMIL SUPREME S77 WINDOWS

ALUWOOD WINDOWS

Hybrid is a new concept in façade supply. Vindr VS offer a range of composite windows, doors and curtain wall combining the long life and low maintenance of aluminium externally with all the benefits of engineered timber internally.

Hybrid windows provide the advantages of fully pre treated engineered timber internally, so any possibility of warping or twisting is eliminated. This combined with the benefits of powder coated aluminium windows externally means maintenance is minimal. Vindr VS use heavy duty hinges as standard. Secure by Design shootbolts installed as standard.

BBA Certification on uvalues:

Double glazed 1.4

Triple glazed 0.94

As project architect for the job I was delighted with the initial design consultation with the team from VindrVS. A quick product fabrication and delivery time frame was critical for this job and VindrVS Windows produced a quality product and delivered on program. The options on finishes available to the client and the accessibility to good showrooms and existing projects helped the Client enormously to envisage the design and end result. The Client's were surprised and delighted at the ease at which the doors open and closed into position and at how the doors completely change the character of the space. VindrVS Windows provided a good follow up service which guaranteed a satisfied Client.

EOC Architects

Hybrid windows have a choice of either natural, painted or stained internal finish. Hybrid offers a choice of finishes in polyester powder in over 200 RAL colours in either gloss, satin or matt.

Hybrid windows are available in double and triple glazed and with the use of spruce timber ie softwood, the system achieves A rating. Windows are available in flush casement, tilt and turn.

Hello Mike,

*I just wanted to thank you for a great job , very well done.
The lads were superb - took great care and when they
left everything was as they found it -
except for 8 new windows and a door! So professional!
The only problem is that the porch now looks tatty!*

*Best regards to you,
Jim*

The Heritage door and window range features the slim profiles and sight lines that are associated with traditional steel doors and windows. However, the system's timeless elegance is also accompanied by the outstanding thermal performance of a modern aluminium system. The Heritage system delivers improved thermal efficiency and long-life performance in comparison to steel windows.

HERITAGE WINDOWS

Heritage provides a modern light-weight, high-strength and cost-effective alternative to traditional steel window and door systems, offering a wide range of benefits ie Increased Lifespan, Improved Thermal Efficiency and Reduced Maintenance.

The Heritage Range can also provide a modern, like-for-like replacement for traditional materials, Heritage is the ideal solution for projects where planning or design demands dictate the installation of sympathetic materials - even for listed buildings.

HERITAGE DOORS

*Many Thanks for a Professional Job that
has made our home so comfortable.*

Mr Donaghue, Darty, Dublin 6

Vindr VS Bifold Doors, Sliding Doors, Casement/Flush Casement Windows, Rooflights, Curtain Walling & Sliding Sash Systems says quality with precision craftsmanship from creation to installation.
